ACADEMIC & RESEARCH PROJECTS

VED – Local AI Companion *Jan 2025 – Apr 2025*
Tech Stack: Python, Ollama (Llama 3), Edge TTS, SpeechRecognition, Pygame, Keyboard, JSON

- Developed an offline AI assistant powered by **Ollama (Llama 3)**, supporting both voice and text interactions without relying on cloud APIs.
- Implemented persistent memory using JSON-based conversation history and rolling context, enabling the assistant to remember previous interactions and user preferences.
- Built a voice-driven interface with **SpeechRecognition** for microphone input and **Edge TTS** for mood-aware neural speech synthesis.
- Designed a multi-command execution system capable of interpreting and performing multiple tasks from a single user request, including application control, website launching, note management, and system utilities.
- Integrated customizable personality settings, runtime preference injection, and conversation recall to deliver a personalized AI experience while maintaining complete local privacy.

CERTIFICATIONS

- **AWS Certified Cloud** — Amazon Web Services | Completed: Oct 2025
